1. The appeal brief filed on May 9, 2005 has been entered.
2. Based on the review of the brief appeal and further examination, applications arguments were found convincing. Therefore, the previous advisory mailed on February 7, 2005 has been withdrawn, and the amendment after final filed January 10, 2005 has been entered. Accordingly:

- Claims 1, 12, 16 and 17 have been amended; and
- Claims 10, 11 and 15 have been cancelled.

***Allowable Subject Matter***

3. Claims 1-9, 12-14 and 16-19 are allowed.

The prior art of record, including Tung (US Patent No.: 5,842,297) in view of Tokunaga (US Patent No.: 5,375,043) and Tarne et al. (US Patent No.: 6,443,582 B1), fails to show or suggest the applicant's invention as claimed. Specifically, the prior art of record does not disclose a lighting apparatus combining:

- a curved surface disposed within a wave guide, and the curved surface including discrete microstructures reflecting localized light events as recited in Claim 1;
- an arcuate bottom surface disposed within a wave guide, and the curved surface including discrete microstructures reflecting localized light events as recited in Claim 12; and

- a curved bottom surface disposed within a wave-guide, and the curved surface including discrete microstructures reflecting localized light events as recited in Claim 16.

The above-indicated combination, including a wave light guide having curved bottom surface bearing discrete microstructures reflecting light in localized areas, makes this disclosure unique.

Tung ('297) discloses a lighting apparatus comprising a wave-guide having a plane bottom surface with discrete microstructures reflecting light in localized areas. However, Tung ('297) does not teach the bottom surface of the wave-guide being arcuated. Similarly, neither combined nor individual teaching of Tarne et al. (582 B1) and Tokunaga ('043) teaches the claimed a curved surface disposed within a wave-guide, and the curved surface including discrete microstructures reflecting localized light events.

Therefore, neither combined nor individual teaching of Tung ('297), Tarne et al. (582 B1) and Tokunaga ('043) meets the limitations of claims 1, 12 and 16.

Therefore, claims 1, 12 and 16 are allowed over prior art.

Claims 2-9 are necessarily allowed because of their dependency on the allowed Claim 1.

Claims 13 and 14 are necessarily allowed because of their dependency on the allowed Claim 12.

Claims 18 and 19 necessarily allowed because of their dependency on the allowed Claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
